

Defects in Hotel App:

Please note that below list is only indicative of some of the known defects introduced in the Hotel Application for testing purpose. There might be more defects in the application which are not listed below.

Build 1 - URL - <http://www.adactin.com/HotelApp/>

Build 2 - URL - <http://www.adactin.com/HotelAppBuild2/>

Bug Summary

S. No.	Title	Build1	Build2	Comments
Defect1	Booking Confirmation with invalid Dates	Yes	Yes	Should use proper date format API
Defect2	Invalid message while canceling the booked itinerary	Yes	Yes	Proper Error Message Should be displayed
Defect 3	Booking is confirmed with invalid Credit Card Expiry Date	Yes	Yes	Credit Card Expiry Date Check needs to be corrected
Defect 4	Booking confirmation page does not display all the necessary confirmation details	Yes	No	This defect is found only on Build 1. Booking information Details like Last Name, Location, Etc is missing
Defect 5	Searching by order id does not support partial String	Yes	Yes	Partial string search is not supported
Defect 6	Error in Total Price(excl GST) Calculation adds \$10 extra	Yes	No	Total Price calculation in Select Hotel Page add \$ 10 extra
Defect 7	Error in Total Price Calculation	Yes	Yes	Total Price does not multiply by number of rooms and number of days. This issue exists in Build 1 and intermittent in Build 2
Defect 8	Invalid auto fill for Check In date	Yes	Yes	The check in date is defaulted to yesterday's date.
Defect 9	All the Room Types are not listed	Yes	Yes	Only Standard rooms are listed.

Defect 10	Error in User Name display	Yes	Yes	Default User Name is displayed in Select Hotel Page
Defect 11	Change Password Functionality does not work as expected	Yes	No (But Single digit pwds are accepted)	Passwords get changed to blank
Defect 12	Room Type is not displayed on Booked Itinerary	Yes	Yes	Issue is intermittent
Defect 13	Fields are Editable on Select Hotel and Booked Itinerary	Yes	Yes	Hotel information and price are editable
Defect 14	Children per room in booking confirmation is not correct if there are no children	Yes	Yes	Children is displayed instead on "0 Children"

1. Defect 1:

Title: Booking Confirmation with invalid Dates

Functionality: Booking Confirmation

Steps:

- Login to Hotel app with login credentials
- Fill in the Mandatory details in Search Hotel Page with invalid dates.
- Click on search button
- Continue with booking by filling in the mandatory details
- Click on Book Now.

Expected Result:

Booking should not be confirmed for invalid dates

Actual Result:

Note: fails both on Build 1 and 2 (No validations on dates)

Build 1: Search Hotel flow accepts invalid dates and Booking is confirmed with \$ 11 total price

Severity: Medium

Priority: Medium

2. Defect 2:

Title: Invalid message while canceling the booked itinerary

Functionality: Booked itinerary

Steps:

- a. Login to Hotel app with login credentials
- b. Click on booked itinerary
- c. Click on cancel selected button on Booked Itinerary Page, without actually selecting an OrderId.

The pop-up still appears which says are you sure wanted to cancel the selected?

Expected Result:

Proper Error Message should be displayed, asking the user to make a selection before canceling

Actual Result:

Build1: The pop-up appears which says “are you sure want to cancel the selected?”

Severity: Medium

Priority: Medium

3. Defect 3:

Title: Booking is confirmed with invalid Credit Card Expiry Date

Functionality: Booking Confirmation

Steps:

- Login to Hotel app with login credentials
- Enter the search hotel details and navigate to book hotel page
- Select invalid year (less than 2015) for Credit Card expiry date, error pops up, ignore and continue booking.

Expected Result:

Booking should not be allowed for invalid Expiry Date

Actual Result:

Build 1 and Build 2: We are allowed to book hotel with invalid expiry year

Severity: High

Priority: High

The screenshot shows a hotel booking form with the following fields and values:

- Billing Address***: 11111111111111111111111111111111
- Credit Card No.***: 9888888888888888 (Note: Use 16 digit Dummy Data)
- Credit Card Type***: American Express
- Expiry Date***: January 2012 (The year 2012 is highlighted with a red box)
- CVV Number***: 098

At the bottom of the form are two buttons: **Book Now** and **Cancel**.

4 Defect 4:

Title: Booking confirmation page does not display all the necessary confirmation details

Functionality: Booking Confirmation

Steps:

- a. Login to Hotel app with login credentials
- b. Search and book the hotel

Expected Result:

The booking Confirmation page should list out all the details using which customer has booked

Actual Result:

Build1: Most of the fields like Hotel Name, Location , Last Name etc are blank in Booking Confirmation Page.

Note: Works fine in Build2

Note: This Defect is intermittent. Most of the time last Name is blank

Severity: High

Priority: High

Booking Confirmation

Hotel Name	
Location	
Room Type	Deluxe

5 Defect 5:

Title: Searching by order id does not support partial String

Functionality: Booked Itinerary

Steps:

- Login to Hotel app with login credentials
- Click on booked itinerary
- Enter partial order id in Search Order Id test field and click go
Example: If Order id is 47LHYIWTXM, search should support partial string like 47 also

Expected Result:

This should allow Partial search

Actual Result:

Build 1 and 2: The Search by Order id does not support partial search.

Severity: Low

Priority: Low

6 Defect 6:

Title: Error in Total Price Calculation adds \$10 extra

Functionality: Select Hotel

Steps:

- Login to Hotel app with login credentials
- Search a hotel by selecting Sydney as the location for 1 day and 1 room

Expected Result:

The Total Price Column (excl.GST) should be same as Price per Night multiplied by number of nights and number of rooms, since GST is getting added again while confirming the booking

Actual Result:

Build 1: The Total Price Column (excl.GST) adds \$10 extra, where as GST is again getting added while confirming the booking

Note: Build 2 works as expected

Severity: High

Priority: High

7 Defect 7:

Title: Error in Total Price Calculation

Functionality: Select and Book Hotel

Steps:

- Login to Hotel app with login credentials
- Search a hotel by selecting Sydney as the location for 2 days and 2 rooms
- Book the Hotel
- click on booked Itinerary

Expected Result:

The Total Price should be Price per Night multiplied by number of nights and number of rooms

Actual Result:

Build1: The Total Price does not multiply by number of rooms and number of days.

Price is incorrect on Select Hotel, Book Hotel and Booked Itinerary screens

13. Defect 13:

Title: Fields are Editable on Select Hotel and Booked Itinerary

Functionality: Select Hotel and Booked Itinerary

Steps:

- Login to Hotel app with login credentials
- Search a Hotel and come to Select Hotel Page
- Edit the price and room type
- Continue Booking
- The Hotel gets booked with invalid information and price

Expected Result:

The fields on Select Hotel should not be editable

Actual Result:

Build1 and Build 2: The fields are editable and the hotel gets booked with invalid data

Severity: High

Priority: High

14. Defect 14:

Title: Children per room in booking confirmation is not correct if there are no children

Functionality: Booking Confirmation

Steps:

- Login to Hotel app with login credentials
- Search a Hotel and do not add any children
- Continue Booking
- The Hotel gets booked with Children per room as "Children"

Expected Result:

Children per room should be 0

Actual Result:

Build1 and Build 2: Children per room is displayed as Children instead of 0

Severity: low

Priority: low
